

Springer School and Center Middle School Supply List 2023-2024

Earbuds or a headset for the text-to-speech and speech-to-text application use on the Asus Chromebooks. **The earbuds or headset must have a microphone built-in**, much like the iPhone earbuds (with audio jack). If the headset is iPhone or iPad compatible (with audio jack) it will work with the Chromebook as well. The most important considerations of this purchase are the microphone and the comfort of the headset for your child. Some children do not like the feel of the internal earbud and prefer a headset such as the Skull Candy headphone with built-in microphone. The headset will stay with the Chromebook and must be present every day for academic work. Note: If you purchased the required headset last year and intend to use it again, please check that both the microphone and audio are both still working properly.

NO PENS or Sharpies Please!
