

High School Summer Learning ~ June 23-July 11, 2025

Build the skills, habits and confidence to thrive in school—and beyond!

Math (grades 9-12)

A hands-on course to sharpen your math skills so you can use them in everyday situations—not just on tests (but yes, tests, too!). You'll practice strategies for solving word problems, tackling geometry, and understanding pre-algebra and algebra, all while building a strong foundation for future success.

*Comfortable, small-group
sessions!*

Writing (grades 9-12)

Boost your writing skills through fun and practical activities that take you step-by-step from brainstorming to final edits. You'll explore creative strategies, use helpful templates and graphic organizers, and leave with tools you can use for any writing assignment. Rising 11th and 12th graders will also get a head start on their College Common App essay with guided practice and feedback.

*Short, impactful classes
make the most of your time!*

Study Skills (grades 9-12)

Take control of your learning with practical tools to boost your study habits, prep for tests, and stay on top of assignments. You'll try out different strategies to see what works best for you—building confidence, reducing stress, and making the most of your time and energy.

College Study Skills

(Students entering or already enrolled in college) This course is designed to improve study habits which promote a healthy balance between social and academic college life. Topics include time management, effective study strategies, note-taking, motivation, procrastination and distractions, exam preparation, and college reading strategies. The course is facilitated by our experienced college learning specialist. Students enrolled will also receive a 1:1, one-hour virtual check-in session during their fall semester with a college learning specialist.
